WEDDING

Spring blossoms, swallows return.
Swallow and lotus elements to
bring out: "Give back" theme.

"RT customize your wedding
theme based on your love story"

LOTUS ELEMENTS

Peace & Tranquility

The groom's personality is very stable and has a sense of ritual, just like the lotus as harmonious and stable.

The lotus flower also blooms seasonally, bringing a sense of ritual to the start of summer. The groom's personality with a sense of ritual can also be reflected by the lotus in full bloom.

The moment they most want to return to is the MCO period, because they just lived together. They get up every day and do what they love. It's a quiet, smooth and happy life. (Lotus also represents peace and tranquility.)

Both of them have an unstained temperament. It's like a lotus growing out of the mud. There is no dirt on the body, which is a symbol of the noble spirit. It means that they are both very opinionated people and not easily influenced by others.

SWALLOW ELEMENTS

The bride's character is very free, like to run around, like a swallow flying freely. But when the swallow returns from autumn to spring, it does not forget its old nest. Every time it returns, it has a different change.

Like the theme of this wedding -- "Give Back", this wedding is about returning home to express gratitude and cherish feelings. The swallow is used to convey the deep love for the hometown and relatives.

Freedom & Return Home

ROUND SHAPE

ELEMENTS

Complete | Family reunion

The round shape represents the complementary personality of the couple. They complement each other's strengths and weaknesses to become better selves.

Also brought out the wedding theme of "giving back", coming home to reunite and reunion.

FIVE SENSE

TO CREATE YOUR
EXPERIENTIAL WEDDING

Sight sense

Visual effects with lighting, design, and decoration to present the couple's exclusive wedding theme.

Your guests not only participate in your wedding but also get to know the couple from the wedding.

"We cover 5 senses in your wedding."

– @recreation_touch

Hearing sense

Language and sound are alive, from the moment it is spoken, it infects every emotion of the listener, and the emotion leads the guest into your story.

Touch sense

Our touch, or tactile sense, is a sense that most people are reasonable. Let the guests feel the texture through the touch, and participate in the wedding to enhance the experience.

Taste sense

Integrate the wedding theme and concept into the design of dessert or wine. Let your guests feel the sincerity of the couple through taste sense.

Smell sense

The sense of smell is the special sense through which smells are perceived.

Customize a special fragrance according to your wedding concept, can bring your guests a different mood and experience.

A romantic wedding scene featuring a couple in traditional Chinese attire. The bride is seated on a patterned cushion, holding a bouquet of flowers and a white folding fan. The groom stands beside her, looking at her. They are positioned in front of a window with delicate lace curtains, through which soft, warm light filters. The room's walls are made of dark wood paneling.

"Give your wedding a different meaning"

A beautiful wedding is not about how much you spend, it is about how much you enjoy it. The more important thing is how much you can connect with your guests, parents, relatives and your friends.
